## React Native/Mobile Developer

Iran, Tehran & Esfahan | +989306373499 | [moosaviabbas93@gmail.com](mailto:moosaviabbas93@gmail.com)

[abbasmoosavi.ir/](https://abbasmoosavi.ir/) | [irioapp.ir](https://irioapp.ir)

### Summary

I'm an energetic, highly positive, hard working developer specializing in mobile, web and server applications.

My main goal is to find out about development resources and new technologies from different sources.

I enjoy encountering challenges for which.

I like clean and beautiful code and I try my best to make the code I write very clean, beautiful and legible.

I try to figure out all possible solutions but then act based on best practices and standard ways. Once I take on a new project in web development, by using the latest technologies I hope to create

innovative software products that are equally beautiful and functional and also create a unique product with an experience worth remembering for users.

I have very good experience and good examples in this field using the following tools:

React native, Android, Flutter, Kotlin.

I also created server-side applications using the following tools:

Adonisjs, Laravel, Django python.

### Work experience

#### React Native/Mobile Developer

15/10/2020 - Present

##### [Improver Digital Tech, Istanbul](#)

I'm React Native/Mobile Developer in here.

Develop Wingle, Meetly and Minimidimaks applications.
